ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: PHOTOACOUSTIC SENSOR

(57) Abstract: Apparatus for stimulating photoacoustic waves in a region of a body and generating signals responsive to the stim-
ulated waves comprising: a light source (27) that provides light that stimulates photoacoustic waves (54) in the region; a light pipe
(26) having an output aperture (80) and at least one input aperture, which light pipe receives the light from the light source at the at
least one input aperture and transmits the received light to illuminate the region from the output aperture; and at least one acoustic
transducer (22) that generates signals responsive to acoustic energy from the photoacoustic waves that is incident on the optical
output aperture.
